NAME: BADGENUMBER: DIVERSE ABILITY:

I think it would be cool if we could accommodate X diverse abilities for Y.

submit

Statement: One of the priorities of our Dell Digital mission is to enable team members of all abilities to be their best and do their best work at Dell.

Opportunity:

Develop an interactive interface for team members to help guide them to potential assistive technologies we offer that could enhance their productivity.

If we do not have an offering that meets the team member use-case, create the capability for an automated intake demand for feature enhancement on existing technology and/or new technology offering.

Select the Top 10 diverse abilities for the workplace: A to Z of Disabilities and Accommodations (askjan.org)(Blindness, low vision, quadriplegia, Autism, etc.)

Dell Team Members should be able to enter their diverse abilities and receive suggestions of assistive technologies from our existing inventory that might help them (rather than having to research themselves).

If they choose to use the technology, they can then order it through Service Now (3rdlink below).

Other Resources:

Dell's consolidated single destination page:
